Six vocabularies, different purposes and scales

619,527 distinct code–vocabulary pairs in the project’s retrieval corpus

	File version	PRIMARY PURPOSE / DISTINCTIVE FEATURE
SNOMED CT US	2025-09-01	**Clinical concepts** Rich relationships; multiple parents
ICD-10-CM	2026	**US diagnosis classification** More detail than ICD-9-CM
Read v2	2020-04-01*	**Legacy UK clinical records** Last terminology update: April 2016
MedDRA	28.0	**Medical-product safety** Five levels; standard safety queries
ICD-9-CM	2014	**Legacy US classification** Diagnosis + procedure codes in this file
ICPC	1993	**Primary care classification** Reasons for encounter, symptoms, diagnoses

Size reflects the local exports, not each terminology’s complete published size.

Counts use the project loader and preprocessing: nonempty descriptions, deduplicated codes, grouping ranges removed.

*Read v2 file identifier; the terminology was last updated in 2016. Sources and version caveats: vocabulary_notes.md.
